AN INNOVATIVE ID CARD PRINTER TECHNOLOGY LEADER

IDP, a leading global manufacturer of Plastic Card Printers, is a trusted source to governments, corporations and universities in over 58 countries.

Since 2005, IDP has engaged in the development, design and manufacture of high-performance plastic card printers with the latest mechanical, electronic, and software technology.

Our success has been grounded by our expertise in the industry.

IDP provides a complete range of desktop plastic card printing solution for desktop color printing, security laminating, and for all of the industry's common magnetic, contact, and contactless smart card encoding.

IDP's printers are used everywhere plastic cards are used, such as employee badges, student IDs, payment cards, access control badges, customer membership, loyalty cards and more.

As a pioneer of SMART card printing technology, our goal is to make plastic card printing widely available, offering business leaders the guidance for distributed or centralized printing projects, and to be the future-ready leaders in the industry.

We look forward to working with you.

smart SERIES

SMART SERIES : The IDP SMART series card printers are manufactured by IDP Corp., Ltd. They are highly engineered dye-sublimation plastic card printers which provide you with maximum efficiency for production of plastic cards in commercial and government applications. The SMART Photo ID printers range from valued-based entry-level to feature-rich professional units. Printers are available in single or dual-sided and offer many additional features, including a flipper, lamination modules, ethernet connectivity, and various encoders such as magnetic stripe, contact, and contactless. The enhanced FINE™ Imaging Technology of the SMART series optimizes printer output to reproduce life-like images and color tones. There is a SMART printer to meet your business needs: Employee IDs, Banking cards, Membership cards, Access control badges, Government credentials, and much more.

TECHNOLOGY

- _ Crystal clear printing with IDP's exclusive FINE™ Imaging Technology
- _ Instant direct heating laminator - fastest laminator technology in the industry *Patent
- _ Rapid Retransfer Printing Technology *Patent
- _ Field upgradeable options for dual sided printing and laminating
- _ Field upgradeable encoders for magnetic stripe, contact and contactless smart cards
- _ Automatic ribbon recognition and no need for calibration motor
- _ Eco-friendly rewritable printing (SMART-31R & 21R)
- _ 500 cards input hopper and scratch free feeding and exiting (SMART-70) *Patent
- _ High-durability: Ruggedized metal frame and shafts, steel ball bearings (SMART-51, 70 & 81)

SOFTWARE

- _ SMART SDK, to develop customized applications
- _ SMART Utilities, to check working states and adjust configurations
- _ SMART IDesigner for designing and issuing cards
- _ On-line life-time technical support

CONVENIENCE

- _ User-friendly design for desktop environment
- _ LCD & LED for status display of printer
- _ Easy Thermal Print Head (TPH) replacement
- _ Front input and output hoppers (SMART-31 & 51)
- _ Drop-in ribbon cartridge (SMART-21, 31 & 51)
- _ Full modular design (SMART-70)
- _ Drawer type ribbon cartridge (SMART-70 & 81)

EASY ISSUING

SMART IDesigner makes it easy to design and print professional badges for a multitude of applications. IDesigner allows you to add images, text, barcodes, manage DB and provide state of the art encoding. SMART IDesigner ensures appropriate card issuance and data management with our SMART series printers. IDesigner offers a simple wizard and templates for convenient and instant card design.

HIGH SECURITY

SMART Series provides effective physical and electronic security features for access control and data encryption.

- | | | | |
|-------------------|-----------------|----------|---------------|
| PC Authentication | Data Encryption | Password | Physical Lock |
|-------------------|-----------------|----------|---------------|

- _ SMART series has a password verification function to provide administrator and user authentications.
- _ SMART series can set a specific authorized PC for encoding and printing cards.
- _ SMART series can encrypt data transmitted on USB and can support SSL (Secure Socket Layer) protocol on ethernet communications.
- _ SMART-51, 70 & 81 series are equipped with a Physical lock and Kensington lock system on the printer or each module to increase security.

POWERFUL NETWORKING

SMART Series can utilize the network printer servers for encoding and printing cards.

SSL (Secure Socket Layer)

- _ SMART Ethernet module can not only print cards but also encode MS, Contact and Contactless smart card through the network.
- _ SMART Ethernet module has OCP(Open Card Print) protocol which can encode and print cards by using commands on multiple platforms without installing the printer driver.

• App developed by OCP (Open Card Print) on Android or iOS mobile device

smart 81

SMART-81 is a new generation retransfer card printer that offers the fastest production speed in the industry.

IDP's innovative retransfer heating technology- Rapid Retransfer Printing technology or "RRP" provides the fastest "Ready to Print" metric in the industry. No more waiting several minutes for your out-dated retransfer printer to heat up.

RRP technology from IDP offers power-on and Ready to Print in only seconds.

The SMART-81 produces higher-quality, sharper-looking images than traditional card printers. It is the perfect choice for demanding applications which require deep dark colors with infinity-edge (full-bleed) graphics on blank or technology cards.

PRINT NOW. PRINT MORE.

No more waiting, save your precious time - SMART-81 gives you the fastest production speed and allows you to experience simultaneously power-on and print in only seconds unlike the traditional dye-sublimation card printers which take several minutes.

Innovative retransfer head heating control technology creates more sharp-looking images and text quality every time.

Perfect printing on embedded chip cards - SMART-81 can print graphical card design right to the edges even on smart cards with uneven surfaces. It's the ideal choice for customers that demand more functionality and high security such as government, bank, education, and healthcare.

FORGET ABOUT DUST & THEFT.

Intelligent anti-dust circulation - Designed with fine dust filter and disposable cleaning roller to help flawless printing quality by removing dust and other particles.

An Intelligent air circulation structure effectively controls the temperature in the printer during continuous card issuance.

Advanced security compliance - SMART-81 prevents theft and counterfeiting of sensitive financial resources.

It is equipped with a physical and electronic locking integration system that complies with the **International Banking Instant Issuance Security Standards**.

Additionally, a secured bolt-down fixture supports high-level security ID card demands.

smart 70

The SMART-70 is a high-performance large capacity ID card printer designed with a unique modular concept that can support various printer configurations to meet the users needs. As seen below, each module is a separate component that is easily attached and synchronized to deliver the perfectly printed and or laminated card. Ideal applications include University ID's, student badging, secure credentials, access control badges, school photography, K12 school IDs, print bureaus, loyalty cards, and more. Virtually any application where the user demands high capacity and high speed printing are well suited to the SMART-70 Series.

Specialty applications such as duplex monochrome, scratch-off personalization, and ultra-high speed (9.9sec YMCKO) can be accommodated with IDP's SMART-70 Dual Printer configuration.

INPUT HOPPER

To disperse the weight of the stacked cards, the card mallet pushes cards to the weight dispersion point and the lowest card is drawn out by hook. This process prevents the stacked cards from making scratches on the lower card's surface.

OUTPUT HOPPER

When a card is put in the output hopper, to protect the card's surface, the loaded cards are raised by the support beam which is operated by the internal CAM.

APPLICATIONS

PRINTING SOLUTION IN VERTICAL MARKETS

IDP card printers help business identity and on-demand security more efficiently, we provide solutions everywhere plastic cards are used such as corporations, financial banking, education, government, and healthcare, and more.

CORPORATION

IDP offers an extended range of printers that will meet the identification and security requirements of all organizations.

FINANCIAL

Banks are establishing instant credit or debit card issuing system in addition to centralized issuing systems. In this case, customers do not need to wait till their financial cards are issued and mailed.

ACCESS CARD

Access control cards have many objectives, including controlling access at point of entry, enabling users to sign documents electronically, and enter controlled facilities with magnetic stripe, contact and contactless smart card.

EDUCATION

Most of all educational organizations need student ID cards. IDP's ID card printers are suitable to issue many types of student ID card.

GOVERNMENT

Government ID cards are typically powerful with multiple layers of security as well as contact or contactless encoding. IDP's printers and supplies offer many options to protect valuable government identities and access.

TRANSPORTATION

Transit cards need to charge money for using public transportation for certain periods. It also needs to be personalized to identify users.

GENUINE IDP CONSUMABLES

IDP offers a complete range of ribbons and consumables especially designed for SMART printers. SMART genuine consumables ensure high-quality printing and reliable performance of SMART printers.

TECHNOLOGIES FOR PRINTER

26

27

1 PLASTIC CARD PRINTING

Plastic cards are prevalent in our daily lives, such as payment cards driver's licenses, membership cards and employee identification badges. Their standard size, portability, and durability make them the ideal choice for many applications.

2 LAMINATION

Lamination is a polyester film laminated to a card's surface to protect it from alteration and wear and tear. Holograms can be added to the lamination for added security. In normal use, a laminate can increase your cards' life by up to 5 times.

3 UV PANEL

The Ultra-Violet (UV) ink panel on a YMCFKO (F is the UV Panel) ribbon is a blacklight reactive ink that is not visible with the naked eyes. It is cost-effective and an easy way to add variable security to your cards. The SMART drivers offer easy tools to personalize UV printing, no matter the ID software in use.

4 ENCODING

Encoding is one of the important functions in ID card printer. We issue ID card not only for visual identification but also for storing digital information. There are three major encoding methods- magnetic, contact IC, and contactless. IDP printers support all three types. New encoding methods and protocols come to market frequently, so contact IDP's Sales Team for the best solution to your encoding needs.
